Machinery Moving Equipment

Buy or Rent

Don't run out of power when you need it most! **New Haven** offers machinery moving equipment to help you efficiently and safely transport heavy and valuable office equipment. From our line of Stair Robots to the Escalera Manhandler—we know what it takes to get the job done without injury to your crew, or damage to your client's equipment.

New Haven Stair Climbers

New Haven's Stair Climbers are sophisticated electronic machines designed to move big heavy items where you need them. Up or down, stairs or inclines up to 45 degrees. They reduce the safety risks during a stair move and minimizes the physical burden on the operator.

SR 1750HE

The SR-1750HE is equipped with an 110 volt electric-hydraulic, "self-leveling" platform which allows horizontal movement of your customer's equipment regardless of the angle of stairs. Designed for two-person operation, the unique SR-1750HE is simply the finest electronic moving machine. It assures up to 2,200 lbs. of lift capacity with its push-button easy-to-use leveling platform and a stable, balanced "center of gravity" providing maximum climbing traction on stairs. With the SR-1750HE, keeping fragile loads always in an upright position will reduce the hazards associated with moving heavy equipment on stairs. Available in both 220 European standard volt or 110 volt electric power supply. Comes complete with angle dolly, extension, platform loading extension, hook & cable loading winch w/hand crank. W: 28-1/2", L: 47", H: 14", Weight: 385 lbs, Cap: 2,200 lbs.

SR450

The SR450 is a battery-powered stair-climbing device; easy to use and designed to handle a wide variety of loads up to 750 Pounds. Twin rubber tracks spread the load comfortably over three treads of a stairway as the SR 450 moves up or down stairs. The SR 450 is equipped with a folding swivel wheel for easy turning in confined spaces and light handling to and from a staircase. Items up to 72" can be handled by use of the extendable handles. W: 460 mm, L: 1220 mm, H: 220 mm, Weight: 49 kg., Cap: 350 kg.
